## The Freedom to Learn What You Want, When You Want, At No Charge!

At [Calyx Software](#), we know that learning all the functionality available in our software can take some time. So, to help set you up for success, we offer complimentary online training and webinars to all our current customers. Users can take as many classes as they need, as many times as necessary. The classes are taught through GoToMeeting™ or GoToWebinar™, allowing for live interaction and instruction by experienced industry consultants with a thorough understanding of the software and how it can be used in daily operations.

Our offering of classes is a constantly growing and evolving body of online classes designed to help you learn what you want, when you want it. Calyx is pleased to announce a new 90-minute training class titled, "[Advanced Business Rules for PointCentral](#)." The new course expands upon the vast Calyx Online class curriculum, which provides industry-leading technical education for all levels of [Point](#)® and [PointCentral](#)® users. The class will teach you the most effective way to manage work flow, and ensure compliance and security for your loan files. Additionally, this class takes advantage of added rules functionality, so you can get the most out of PointCentral 7.6. Please note that the Calyx online class "Using Business Rules in PointCentral" is a prerequisite.

### ATLOS - The Better Way to Manage Loan Documents

Are you tired of fumbling through paper loan files, trying to find a specific document? How about the complexities of managing the receipt or transmission of 30-40 different documents in the average loan file?

If the answer is yes, then [ATLOS mortgage software](#) is your solution. Our document management software is tailored for the mortgage industry, and allows all parties involved in the loan transaction to easily and securely deliver documents to a central system. There's no more running to the fax machine, digging through emails looking for a specific attachment, or waiting on paper documents to be delivered.

How do we do it? ATLOS automatically creates an electronic loan file that allows parties involved in the loan transaction to send, receive, view, edit, and track the status of documents directly from ATLOS.

### Home Sales are on the Rise - Grow Without the Added Overhead with Loan Processing Solutions from MTG Processor

Across the country, home sales are on the rise. Growth over the last three months has been particularly promising which is a hopeful sign that the housing market is gradually improving. The increase in business you've probably felt during this period might be tempting you to add processing staff. While home sales have increased, we're still below the 6 million per year mark of a healthy economy. So how can you scale your staff to expand with increased home sales without the risk and cost associated with recruiting, hiring and training? Your alternative is [MTG Processor](#), a contract mortgage loan processing company integrated into Calyx Point.

Traditionally, companies lay out the funds to recruit, hire and train processors in hopes they have enough ongoing future volume to cover the cost of guaranteed base salaries, bonuses and benefits. MTG Processor offers another way to intelligently scale your company's growth without the overhead and risk

associated with hiring more full-time staff. We charge a flat processing fee when the loan funds and if a loan doesn't fund, we waive our fee!

### Getting Your Debt Ratios Right

We've received multiple calls from our customers wondering how to get the correct debt ratios in Point. Although most commonly this is a result of entries in the Anti-Steering Disclosure, this particular issue could have started in a couple of different places within the software. To get full details on where to make the adjustments, please visit our Knowledge Base [article 0422](#) at [www.CalyxSupport.com](http://www.CalyxSupport.com)
